### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The instant invention is directed to an unobvious improvement the wind turbine drive train art. Specifically, Applicant claims a combination gear train and generator that allows for the simple removal of either component without complete disassembly of the wind turbine. Applicant claims a gear and generator locator on the opposite side of the tower from the rotor. The generator is constructed as a ring concentrically embracing the gear.

Prior art references such as Pettersen et al. (6,911,741) and Umemoto et al. (6,483,199) disclose ring type generators and fins attached to the outer surface to nacelle to draw off heat. While Pettersen et al. discloses a similar wind turbine system, it does not disclose a gear attached to the turbine shaft as claimed by Applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
